

MEMORIAL DAY SUPER SIMPLE Icing

Ingredients:

1 cup powdered sugar
1/2 tsp. vanilla extract
1 to 2 Tbsp. water
Food Coloring

Instructions:

Mix sugar, vanilla, and water into a bowl. Add water a little at a time so it's not too runny. When you get the perfect consistency, the icing will sit on top of the cookie without running off the edges.

TIP: Make sure the cookies have cooled down to room temperature. Dip the cookie face down into the bowl. Using a knife, spread the icing to the corners. If the icing is too runny, simply add more powdered sugar.

The fun part is icing the cookies! Mix drops of food coloring into your icing and have fun! We even discovered that if you drop dye into a small bowl of water, you can paint right on top of the cookie like a water color —so cool! The BEST part is eating the cookies and making this a family event to remember Memorial Day!
